Full-stack web developer passionate about the user experience and what drives user interaction. Experienced in working with and managing teams. Motivated by ongoing learning and personal growth. Excited to employ skills as a web developer while continuing to adapt to new technologies, developments, and user preferences.

## TECHNICAL SKILLS

**Languages:** HTML, CSS, JavaScript, SQL
**Tools:** GitHub, Heroku, VSCode, Bootstrap, Node.js, JQuery, React, Handlebars, MySQL, MongoDB, APIs, Express.js, Mongoose, Sequelize, React

## EXPERIENCE

**Office Assistant Lead**                                                                                      2019 – Present
**Central Washington University**                                                             Ellensburg, WA
- Adapted daily to the challenges and tasks at hand
- Assisted in the development of a number of university webpages in Central's new 2019 web theme
- Led the development of a database for campus COVID-19 contact tracing
- Recognized twice for service excellence through the Wildcat Way spotlight

**Management Associate II**                                                                              2018 – 2019
**Hertz**                                                                                                                Yakima, WA
- Protected customer information and mitigated fraudulent transactions
- Compiled weekly reports on Excel spreadsheets and uploaded them to Microsoft Teams
- Ensured fleet of vehicles was well maintained

## PROJECTS

**The Smoking Gun**
**Repository: https://github.com/UWB-Bandits/the-smoking-gun**
**Deployed: https://the-smoking-gun.herokuapp.com/**
- A customizable, digital bullet journal where users can store different kinds of information all in one place. Built mobile-first, this application will allow users to stay organized both at home and on the go.
- Developed frontend styling and list, habit, and journal features.
- Utilizes React, MongoDB, Mongoose, Axios, Express, Material-UI, Firebase, FullCalendar, Chart.js, Gravatar, Geolocation, various APIs.

**React Employee Directory**
**Repository: https://github.com/aubrey-heim/react-employee-directory**
**Deployed: https://aubrey-heim.github.io/react-employee-directory**
- Leverages react components to easily respond to user interaction and inputs. Users are able to sort or search by name, phone number, or email of employees.
- Developed both frontend and backend as the sole developer.
- Utilizes React, JSX, Axios, Bootstrap, randomuser.me

**gifNjelly**
**Repository:** [https://github.com/TommyWillen/gifNjelly](https://github.com/TommyWillen/gifNjelly)
**Deployed:** [https://mighty-fjord-82642.herokuapp.com](https://mighty-fjord-82642.herokuapp.com)

- gifNjelly users are able caption gifs that are currently trending. Other users are then able to vote on these captions.
- Collaborated on backend development with a focus on Sequalize.
- Utilizes SweetAlert, Handlebars, Giphy API, Express, Sequelize, MySQL, Passport, BCrypt, and Axios.

## EDUCATION

**Bootcamp Certificate: 2021** University of Washington, Seattle, WA
Completed intensive 24-week program focused on building dynamic web programs.

**Bachelor's Degree, Business Administration: 2017** University of Washington, Bothell, WA
Graduated Magna Cum Laude with concentrations in Marketing and Retail Management.
